Forward-Looking Statements

This press release contains forward-looking statements including, among other things, statements regarding Workday's first quarter and full year fiscal 2027 subscription revenues and non-GAAP operating margin, growth, innovation, opportunity, and investments. These forward-looking statements are based only on currently available information and our current beliefs, expectations, and assumptions. Because forward-looking statements relate to the future, they are subject to risks, uncertainties, assumptions, and changes in circumstances that are difficult to predict and many of which are outside of our control. If the risks materialize, assumptions prove incorrect, or we experience unexpected changes in circumstances, actual results could differ materially from the results implied by these forward-looking statements, and therefore you should not rely on any forward-looking statements. Risks include, but are not limited to: (i) breaches in our security measures or those of our third-party providers, unauthorized access to our customers' or other users' personal data, or disruptions in our data center or computing infrastructure operations; (ii) service outages, delays in the deployment of our applications, and the failure of our applications to perform properly; (iii) competitive factors, including pricing pressures, industry consolidation, entry of new competitors and new applications, advancements in technology, and marketing initiatives by our competitors; (iv) privacy concerns and evolving domestic or foreign laws and regulations; (v) any loss of key employees or the inability to attract, train, and retain highly skilled employees; (vi) our reliance on our network of partners to drive additional growth of our revenues; (vii) the regulatory, economic, and political risks associated with our domestic and international operations; (viii) our ability to realize the expected business or financial benefits of any acquisitions of or investments in companies; (ix) adoption of our applications and services by customers and individuals, including any new features, enhancements, and modifications, as well as our customers' and users' satisfaction with the deployment, training, and support services they receive; (x) the regulatory risks related to new and evolving technologies such as AI and our ability to realize a return on our development efforts; (xi) delays or reductions in information technology spending; (xii) adverse litigation results; (xiii) changes in sales, which may not be immediately reflected in our results due to our subscription model; and (xiv) the impact of continuing global economic and geopolitical volatility on our business, as well as on our customers, prospects, partners, and service providers. Further information on these and additional risks that could affect Workday's results is included in our filings with the Securities and Exchange Commission ("SEC"), including our most recent report on Form 10-Q or Form 10-K and other reports that we have filed and will file with the SEC from time to time, which could cause actual results to vary from expectations. Workday assumes no obligation to, and does not currently intend to, update any such forward-looking statements after the date of this release, except as required by law.

Any unreleased services, features, or functions referenced in this document, our website, or other press releases or public statements that are not currently available are subject to change at Workday's discretion and may not be delivered as planned or at all. About Non-GAAP Financial Measures

To provide investors and others with additional information regarding Workday's results, the following non-GAAP financial measures are disclosed: non-GAAP operating income, non-GAAP operating margin, non-GAAP diluted net income per share, and free cash flows. Workday has provided a reconciliation of each non-GAAP financial measure used in this earnings release to the most directly comparable GAAP financial measure. Non-GAAP operating income and non-GAAP operating margin differ from GAAP in that they exclude share-based compensation expense, employer payroll tax-related items on employee stock transactions, amortization expense for acquisition-related intangible assets, acquisition-related costs, and restructuring costs. Non-GAAP diluted net income per share differs from GAAP in that it excludes share-based compensation expense, employer payroll tax-related items on employee stock transactions, amortization expense for acquisition-related intangible assets, acquisition-related costs, restructuring costs, gains and losses on strategic investments, and income tax effects. Free cash flows differ from GAAP cash flows from operating activities in that it treats capital expenditures as a reduction to cash

flows.

Workday's management uses these non-GAAP financial measures to understand and compare operating results across accounting periods, for internal budgeting and forecasting purposes, for short- and long-term operating plans, and to evaluate Workday's financial performance. Management believes these non-GAAP financial measures reflect Workday's ongoing business in a manner that allows for meaningful period-to-period comparisons and analysis of trends in Workday's business. Management also believes that these non-GAAP financial measures provide useful information to investors and others in understanding and evaluating Workday's operating results and prospects in the same manner as management and in comparing financial results across accounting periods and to those of peer companies.

Management believes excluding the following items from the GAAP Condensed Consolidated Statements of Operations is useful to investors and others in assessing Workday's operating performance due to the following factors:

- *Share-based compensation expense.* Share-based compensation primarily consists of non-cash expenses for employee restricted stock units and our employee stock purchase plan. Although share-based compensation is an important aspect of the compensation of our employees and executives, this expense is determined using a number of factors, including our stock price, volatility, and forfeiture rates, that are beyond our control and generally unrelated to operational decisions and performance in any particular period. Further, share-based compensation expense is not reflective of the value ultimately received by the grant recipients.
- *Employer payroll tax-related items on employee stock transactions* We exclude the employer payroll tax-related items on employee stock transactions in order to show the full effect that excluding share-based compensation expense has on our operating results. Similar to share-based compensation expense, this tax expense is dependent on our stock price and other factors that are beyond our control and do not correlate to the operation of our business.
- *Amortization of acquisition-related intangible assets* For business combinations, we generally allocate a portion of the purchase price to intangible assets. The amount of the allocation is based on estimates and assumptions made by management and is subject to amortization. The amount of purchase price allocated to intangible assets and the term of the related amortization can vary significantly and are unique to each acquisition and thus we do not believe this activity is reflective of our ongoing operations. Although we exclude the amortization of acquisition-related intangible assets from these non-GAAP financial measures, we believe that it is important for investors to understand that such intangible assets were recorded as part of purchase accounting and contribute to revenue generation.
- *Acquisition-related costs.* Acquisition-related costs include direct transaction costs, such as due diligence and advisory fees, and certain compensation and integration-related expenses. We exclude the effects of acquisition-related costs as we believe these transaction-specific expenses are inconsistent in amount and frequency and do not correlate to the operation of our business.
- *Restructuring costs.* Restructuring costs are associated with a formal restructuring plan and are primarily related to workforce reductions, the closure of facilities, and other exit and disposal activities. We exclude these expenses because they are not reflective of ongoing business and operating results.
- *Gains and losses on strategic investments.* Our strategic investments include investments in early stage companies that are valuable to Workday customers and complementary to Workday products. Gains and losses on strategic investments may result from observable price adjustments and impairment charges on non-marketable equity securities, ongoing mark-to-market adjustments on marketable equity securities, and the sale of equity investments. We do not rely on these securities to fund our ongoing operations and therefore we do not consider the gains and losses on these strategic investments to be reflective of our ongoing operations.
- *Income tax effects.* We utilize a fixed long-term projected tax rate in our computation of the non-GAAP income tax provision to provide better consistency across the reporting periods. In projecting this long-term non-GAAP tax rate, we utilize a three year financial projection that excludes the direct impact of the items excluded from GAAP income in calculating our non-GAAP income. The projected rate considers other factors such as our current operating structure, existing tax positions in various jurisdictions, and key legislation in major jurisdictions where we operate. For fiscal 2027 and 2026, we determined the projected non-GAAP tax rate to be 19%, which reflects currently available information, as well as other factors and assumptions. We will periodically re-evaluate this tax rate, as necessary, for significant events, relevant tax law changes, material changes in the forecasted geographic earnings mix, and any significant acquisitions.

Additionally, with regards to free cash flows, Workday's management believes that reducing cash provided by operating activities by capital expenditures is meaningful to investors and others because it provides an enhanced view of cash flow generation from the ongoing operations of our business, and it balances operating results, cash management, and capital efficiency.

The use of these non-GAAP measures have certain limitations as they do not reflect all items of expense or cash that affect Workday's operations. Workday compensates for these limitations by reconciling the non-GAAP financial measures to the most comparable GAAP financial measures. These non-GAAP financial measures should be considered in addition to, not as a substitute for or in isolation from, measures prepared in accordance with GAAP. Further, these non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore comparability may be limited. Management encourages investors and others to review Workday's financial information in its entirety and not rely on a single financial measure.
