

Workday Announces Workday Data Cloud Integration with AWS, Giving Developers Direct Access to Workday's Governed Data Layer

New Integration Provides Bi-Directional, Zero-Copy Access Between AWS Data and AI Services, and Workday's HR and Finance Data

Workday Data Cloud Capabilities for AWS Customers Coming Soon in Early Access

LAS VEGAS, June 2, 2026 /PRNewswire/ -- **Workday DevCon** — [Workday, Inc.](#) (NASDAQ: WDAY), the enterprise AI platform for HR, finance, and IT, today announced that [Workday Data Cloud](#) will integrate with Amazon Web Services (AWS). With the new integration, developers have bi-directional zero-copy access to Workday's governed HR and finance data from the AWS tools and AI services they already use, without needing to build custom pipelines, duplicate data, or rebuild business logic from scratch. With this integration, Workday Data Lake, Workday Data Connect, and Workday Live Data Query will be available for AWS customers in early access soon.
